

HOCKEY LOCKER - Knocked Down or Welded

The Hockey Locker, available in knocked down or welded construction, combines an athletic style locker with a spacious and unique footlocker / bench seat, base unit. Unlike traditional open athletic lockers, the Hockey Locker seat extends 12" from the locker opening providing a more comfortable seating area and increased storage capacity. By combining a seating area and gear storage in one unit the usable square footage in your locker room is increased by eliminating the need for separate bench and pedestal units

Standard Features

- Body:** 16 gauge cold rolled mild steel
Bottom of base unit - 304 Stainless
- Hinge:** Continuous hinge supporting bench seat
- Venting:** Diamond perforations in front and side panels
- Interior:** 16 gauge steel divider panel welded inside box prevents stored items from being pushed to the back of unit
- Sizes:** Unit height should provide an 18" seating height. Width and depth manufactured according to the style and size of lockers to be used.
- Finish:** 2 - 3 mil average thick powder coat
- Seating:** Plastic laminate over MDF and hardwood. Choose from a wide variety of laminate patterns
